

THE OYEN NEWS

Vol. 20 No. 15

OYEN, ALBERTA WEDNESDAY JUNE 7, 1933.

"Good-Bye Uncle Jock"

Said Vera Fleck, (left) and Lyette Teppaz, as they shook hands with Captain R. G. Latta, and left the Canadian Pacific liner Empress of Britain at Pater Point, Quebec, to make an aeroline dash to Montreal on their way to Chicago where they are contestants in the selection of a "Queen" of the Century of Progress Exposition. No matter what the contest results Vera and Lyette will carry memories of a thrilling first voyage home with them. The Empress of Britain, one of the world's fastest liners, broke two records for them, and a combination of fast ship, fast plane and fast train gave the two pretty girls the distinction of making the fastest voyage from London and Paris to Chicago ever recorded. They travelled so fast all the way that Miss Teppaz, who lunched in Paris, Friday, May 18, found herself breakfasting less than six days later in Chicago, May 25. Miss Fleck's record was from breakfast to breakfast. Canadian Pacific officials arranged every detail of their entire journey which, with the exception of two hours and fifty minutes in the air, used the facilities of that organization.

Cereal Defeats Oyen Baseball Team 7-5

(By J. H. Cooper)

An aggregation of ball players coming from a radius of some twenty miles around Cereal and playing under the colors of the aforementioned town met and successfully defeated the Oyen team on Sunday. A good crowd of ball fans was on hand to view the display; but, when the game was threatened by the onset of inclement weather, their numbers were considerably diminished.

The encounter opened in a most auspicious manner insofar as the local boys were concerned. Only three men faced Brown in the first inning and these were easily retired in the order of their appearance. In the same canto Lang's single was followed by Thygesen's bingle through the box. Korny was walked, but Lang was thrown out at the plate in an attempt to reach home. Brown however, brought in Thygesen with a long sacrifice fly to right centre and the locals found themselves in the lead for the first and only time in the game.

In the second frame the visitors commenced to hit Brown quite freely and carried the plate on three occasions. They added another in the following inning, but the locals were still unable to retaliate in their turn at the plate.

In the fourth Korny singled, stole a base when his opponents were engaged in other pursuits, and came home when Brown's long fly was muffed in the outfield. At this time it appeared that the locals had every chance of emerging from the fray with a victory to their credit. They had been playing almost flawless ball in the field, and all but one of the counters Cereal had made were of the earned variety.

In the fifth however, the local

Percy Hall Passes

It is with deepest regret that we have to announce the passing, on Wednesday, May 31, 1933, at 11:30 p.m. of our esteemed neighbor Mr. Ronald Percival Hall, eldest son of Mr. and Mrs. John Hall of Campbellford, Ontario.

The late Mr. R. P. Hall was born in Campbellford 46 years ago, received his education in the East, and came to Western Canada in 1910 to engage in farming, settling in the Beaton district. Mr. and Mrs. R. P. Hall returned to Ontario in 1917, but came back here to their farm in 1922. In addition to many relatives and friends both in the Eastern and Western provinces he leaves to mourn his loss his widow, Mrs. Lorna Hall (formerly Miss Langmuir of Campbellford, to whom he was married in that town on January 5 1916) also a daughter Miss Jean Hall, and son Roy.

The funeral service, conducted by the Rev. W. Geiger, was held in the Community Hall, Aetonia Valley, Alta., at 2 p.m. Saturday, June 3. There was a very large assembly to pay their last respects both at the hall and at the cemetery, whilst the beautiful and numerous floral offerings and decorations served to emphasize the sympathy felt and expressed for the bereaved; the impressive vocal and instrumental music provided by friends during the service also was greatly appreciated by the family, and enhanced the solemnity of the occasion.

The following friends officiated as pall bearers: Messrs. M. J. Cheppie, J. W. Ferguson, C. A. E. G. Robinson, R. S. Snell and A. J. Thurston.

In addition to the widow and children, and parents of the deceased the other members of his immediate family are Mr. Clifford Hall, brother of Trenton, and Mrs. Annie Paice, sister of Belleville, both of whom arrived from Ontario in time for the service; also four other sisters—Miss Myrtle Hall, of Campbellford and Mrs. Helen Bramhall of Belleville, Ontario; and Mrs. Ethel White and Mrs. Isabella Bugler both of Calgary.

Mounted Police Anniversary

The Royal Canadian Mounted Police formerly the Royal Northwest Mounted, celebrated its diamond jubilee in May, the force being established just 60 years ago. The first post in Alberta was established in 1873 on the site of the present town of Macleod.

Debt Adjustment Act in Force

The new debt adjustment act of the province, passed at last session, came into force on June 1. The announcement was made by W. Loebe, chairman of the new debt adjustment board just set up.

infield went to pieces. Vanstone reached first on a fumbled grounder, attempted to steal second, advanced to third when the local second baseman dropped the throw, and scored when our third-sacker followed suit. Three runs were then scored by the visitors where zero would have been their total had the ball been properly fielded.

Korny replaced Brown in the sixth and held the visitors to no runs and one hit for the remaining four innings. A double from Korny's bat in the sixth which was followed by singles from the two following batters, resulted in two more counters. One more was added in the ensuing frame bat, try as they would the team was unable to overcome the two-run lead that the visitors had already amassed. The game ended with the score 7-5 in favor of the Cereal boys.

The game was marked by the return to the mound of "Hank" McMurray, who turned in a sterling pitching performance for the boys from the west. He was materially aided by good support from his teammates, who committed but three errors whereas the locals

DOMINION TO CONTINUE WITH RELIEF PAYMENTS

Ottawa, Ont.—Dominion contribution to direct relief in municipalities of Saskatchewan, Manitoba and Alberta will continue at \$3½ per cent to December 31, under new agreements with the provinces, it was learned tonight.

In unorganized districts, the Dominion will continue to the end of the year to pay 50 per cent of the cost of direct relief.

The contribution of the Dominion of the total cost of caring for single unemployed men up to a maximum of 40 cents per diem will be maintained.

The back-to-the-land assistance policy is to be continued.

The agreement with the three prairie provinces will be drafted very much along the lines of the relief agreements which expired on March 31.

The documents will be submitted to the respective governments for signature.

Conferences between members of the Dominion government and western ministers have been under way for the past few days on the subject.

Hon. M. A. MacPherson, Attorney General and Provisional Treasurer of Saskatchewan; Hon. J. E. Brown, Alberta Premier; Hon. W. J. Major and Hon. W. D. Clark, of the Manitoba Government represented the prairie provinces.

The whole situation of unemployment and relief in the west in a series of conferences. Every phase of conditions was gone into carefully. Resulting from these parleys, agreements for extension of relief were reached.

Fair Play To All

Radio Commission To Be Impartial At Elections

London, Eng.—In the event of a general election the Canadian radio broadcasting commission will endeavor to see fair play to given all parties in the use of radio, though no definite regulations have yet been laid down, says Hector Charlesworth, in a letter to the London Times, replying to a request as to the attitude of the commission in a general election campaign.

While no definite regulations have been laid down, Mr. Charlesworth writes: "I assume that when the time does arrive we shall adopt the same course as that of the British Broadcasting Corporation and Great United States networks, of asking parties to arrange among themselves how much time they desire so all may obtain fair play."

The sequence and extent of the B.B.C. campaign has been a matter of arrangements between the party whips at Westminster.

Manitoba University

Board Of Governors Planning Re-Organization Of The Staff

Winnipeg, Man.—In order that they might have a free hand in planning re-organization of the staff, governors of the University of Manitoba have requested resignations of all teachers, and those employed on the administrative and operating staff of the university.

Services of the teaching staff will be terminated at the end of August, and those employed on the administrative and administration staffs have been given their notice, effective June 30.

It is understood the government grant this year is insufficient to maintain the university for more than six months, and unless radical relief and staff re-organizations are made, the institution would be forced to close in six months.

Dean Still Pessimistic

London, Eng.—Dean Inge, whose gloomy pronouncements have been well known, thinks England has seen the peak of her power. "I don't want to be other than hopeful about our future," he says, "but I certainly think that as a great power England culminated in the 19th century."

Many From Western Canada. Quebec, Que.—Parties arriving from western Canada and the Pacific coast increased to almost 600 the number of members of the Oxford Group who attended the house party here. The latest came from Vancouver, Calgary, Regina, Edmonton, Winnipeg and parts of Ontario.

W. N. U. 1937

Export Balance

Canada Shows Excess Of Exports

Ottawa, Ont.—Canada as an international trading corporation issued a balance sheet for 1932 operations, reporting a net export balance of \$623,000,000. Exclusive of capital movements, it showed an excess of exports over imports of \$72,000,000.

Commodity trade alone showed an export balance of nearly \$80,000,000. In the invisible trade column—tourist traffic, interest payments, etc.—there was an import balance of \$123,000,000. Deducting net gold exports of \$67,000,000 and the commodity export balance left a net export balance of \$622,000,000 for the year.

In net commodity trading, contributing deliveries for settlers effects and other non-commercial imports, exports totalled \$496,273,000 and imports \$416,566,000.

Considering sale and purchase of securities, maturities and direct investments, the net outflow of capital totalled \$23,000,000 which represented the country's net export balance of the year.

Security transactions represented an export total of \$120,000,000 and an import total of \$100,000,000.

Maritime added \$75,000,000 to the import side of ledger. Direct investments totalled \$2,000,000 leaving the net capital outflow at \$23,000,000.

In issuing the statement, the Dominion Bureau of Statistics explained there were wide variations in the total debts and credits, due to the necessity of estimating such items as tourist traffic.

Arctic Murder Trial

Ekimov In Copenhagen River District Charged With Killing Native

Edmonton, Alberta.—The first murder trial since his appointment last year as stipendiary magistrate for the Northwest Territory, will be held at the mouth of the Copenhagen River next month by J. M. Douglas.

In this hearing, an Ekimov named Ah-Ig-lak, will be tried on the charge of having killed another native named Arnaauk. The crime, said to be an ancient feud, will be tried on the charge of having committed a year ago on the mainland, immediately south of King William Island.

According to police reports, the accused is alleged to have committed the murder of a native named Arnaauk in Ah-Ig-lak's wife, it was claimed.

Following to the residence of the northern ports, word of the crime was not received by the R.C.M.P. until some months after it occurred. Then Constable A. S. Wilson set out from Cambridge Bay and later arrested Ah-Ig-lak, who was a member of the Ekimovs, who are on Adelaide Peninsula.

Mr. Douglas will leave the city on June 13 for the north. He will travel by boat to Port Norman, at which point he will board an aeroplane for Great Bear Lake. At that point another machine will continue the flight to Copenhagen River.

Judge Stubbs Retired

Order-In-Council Is Passed By Ottawa Cabinet

Ottawa, Ont.—Dominion cabinet passed an order-in-council retiring Judge Lewis S. George Stubbs, of Winnipeg. It did not name his successor.

The Ford report found Judge Stubbs guilty of misbehaviour on June 21 of the Judge's act and that after very careful consideration of these findings and of all the circumstances and considerations appearing from the commission's report, the minister (Mr. Cahan) cannot avoid the conclusion that as the commissioner, whose ability and impartiality is unquestioned, has found his honor Judge Stubbs, guilty of misbehaviour in office, your excellency-in-council should forthwith give effect to these findings.

Refuses To Arbitrate

Geneva, Switzerland.—League of Nations received a communication from Bolivia, which, it was said, constituted non-acceptance of the league's proposal to settle the dispute with Paraguay over the Chaco by sending a commission to establish basis of arbitration.

Broad From New Wheat

Grandfield, Okla.—Leaves of bread from this year's first harvest have been sent to President Roosevelt and Governor William Murray by air mail.

HEIR TO THRONE DEPLORES POLICY OF ISOLATION

London, Eng.—The Prince of Wales, a distinguished Anglo-American gathering of the Pilgrimage Society that the United States and Great Britain are now realizing "no country can prosper in isolation."

The heir to the throne introduced Robert W. Bingham, new United States ambassador to the court of St. James, to the 250 persons The Prince paid tribute to the "strong lead" the new United States government has taken to end the depression.

The Prince of Wales said "until world conditions had caused recent suffering, but citizens of the United States have renewed confidence and hope."

He plunged into the realm of economics and world affairs in his address, declaring "in the great catastrophe which has overtaken our world, America is realizing with Great Britain that under the present economic system no country can prosper in isolation."

He talked of the growing independence of nations and said "if the depression can teach us the vice of economic nationalism, then the great depression itself may prove the opening of a way to the ideal when there will be no poverty."

The Prince stressed the importance of the disarmament conference and the coming world economic conference, saying the degree of their success may well depend upon the co-operation of the United States and Great Britain.

Mr. Bingham was given an unusually warm welcome when he rose to speak. The guests, including the Archbishop of Canterbury, stood and applauded before drinking Mr. Bingham's health.

Quoting a passage from Mr. Roosevelt's inaugural address—"The only thing we have to fear is itself"—Mr. Bingham said "from the moment that inaugural address went out to the whole listening nation, the sombre clouds of despair began to lift, paralysis of fear was replaced with hope and courage and with uplifted spirits and hearts the whole people accepted a leadership, bold, wise, statesmanlike and inspiring."

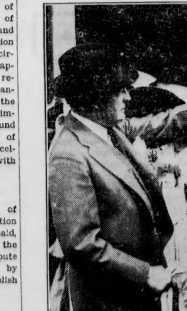

"What has happened since then is really incredible," he continued. "But what perhaps is of more importance to you is the phenomenal recovery which has been made which indefinitely enlarges the influence which the United States has to offer in behalf of world peace and world recovery and, also vitally important, the changed attitude on several accounts by the people of the United States through their misfortunes in recent years."

"This change must be understood by anyone who seeks to measure the future of the American government and the American people," he said.

Discussing what he described as changed attitude of Americans, Mr. Bingham said: "I shall give you one concrete example. For years the majority of American people believed that the higher the tariff, the higher wages and the general level of prosperity in the country would be. Now they have learned the grim lesson that with the highest tariff the country has ever had, more than 13,000,000 people have no wages at all."

"By bitter experience they have learned."

MADE PREMIER

Executive In Session At Ottawa Settles Vexed Question

Ottawa, Ont.—The question of the amount to be paid countries carrying mail intermediaries from origin and destination has been settled by the executive of the World Postal Union in session here. It was agreed to recommend to World Postal Congress which meets in Cairo next year, a modest reduction be made in the amounts paid to carrying countries other than nations in which the mail originated or to which it was designed.

The question has been a concern of the Union since its inception. Closer uniformity in postal rates was also agreed upon. The universal rate is theoretically 25 centimes in gold. The allowable deviation above this was recommended as being reduced from 50 to 40 per cent. The allowable rate is below 20 per cent.

The delegates here are preparing the agenda for the World Postal Congress to be held in Cairo next year and will be in session for more than six weeks.

Central Wheat Production

Western Provinces Have Pledged Support To The Principle

Winnipeg, Man.—Governments of the three prairie provinces have pledged their support for the principle of curtailing wheat production or controlling exports for the purpose of stabilizing prices, and have offered to cooperate with the Dominion Government in achieving such an objective. The proposals are contained in a wire to Premier R. B. Bennett, forwarded by representative of the three provinces this week.

The proposals particularly stressed the necessity of an agreement being reached at the World Economic Conference in London, England, between the wheat-exporting countries of the world and the United States in the marketing of any crop handled after July 1 this year.

"It is a great step forward towards maintenance of the price of wheat," he asserted. "It does contain a reservation similar to the reservation retained by Great Britain in the Locarno Treaty. But from my standpoint, I do not believe there is a 10-year-old child of average intelligence anywhere in the world who could fail, in event of war, to select instantly the aggressor."

"I do not now speak to you pessimistically," Mr. Bingham went on. "This is not time for pessimism but for faith and courage. But I am convinced our civilization, as we stand in this balance, I do believe another general war will certainly destroy it."

"We must believe that civilization, as we have known and enjoyed it, cannot exist much longer unless the burdens which oppress mankind are lifted soon. In this, the great crisis in human history, I repeat I believe the foundation of hope of our world lies in whole-hearted concerted action between Great Britain, the United States, the Commonwealth, and the United States."

"I do not now speak to you pessimistically," Mr. Bingham went on. "This is not time for pessimism but for faith and courage. But I am convinced our civilization, as we stand in this balance, I do believe another general war will certainly destroy it."

Truce Has Been Signed

Combatants Arrange Formal Armistice In North China Warfare

Shanghai, China.—A formal armistice in the North China warfare has been signed by military representatives of China and Japan at Tangku. The truce provision for the demilitarization of the area bounded by the Great Wall on the north, the Peiping-Mukden Railway on the east, and the Peiping-Shuiyuan Railway on the west. Second, the dissolution of the Chinese volunteer corps in this area; third, the resumption of rail traffic between Peiping and Shanhaiwan.

Earl Beatty, Admiral of the British Fleet, was photographed above as he expressed interest in the dramatic changes in the part in the colorful Greenwich Night Pageant held by the British Royal Naval College in June. The ladies are dressed in costumes of the early eighties.

JAPAN PROVING A MENACE TO BRITISH TRADE

London, Eng.—Japanese competition in world markets is creating alarm. Industrial federations are passing resolutions calling attention to prevailing conditions and both sides of the House of Commons echo the uneasiness.

The government already has given notice of the withdrawal of the West Africa colonies from the Anglo-Japanese trade agreement. This was done to enable these colonies to give preference to British goods.

A special committee of the federation of British industries has submitted a report to the board of trade in which it is estimated that during the next 20 to 30 years Japanese population will likely increase by 15,000,000 to 20,000,000. Only a fraction of these the report states, can be fed out of Japan.

"It is inevitable," the report adds, "that competition must be increasingly intense. Depreciation of the yen has been deliberately used to embark on a reckless national sales policy with disastrous results to British and other traders in various markets."

"It is inconsistent both with our own national policy of protecting British industry and the inter-imperial arrangements concluded at Ottawa that this Japanese competition should be permitted to continue unchecked in British and colonial markets without concerted action being taken to safeguard British interests in those markets."

In the House of Commons David Kirkwood, Scottish Labor member, asked what steps were being taken to protect British workers against the competition of Japan. From the other side of the House Sir W. H. Dawson, Conservative member for South Kensington, demanded that the government should previously was a British market, Japanese print goods were being sold at cents a yard ending Japan to supply 10 per cent of the Malaya demand.

"It is inevitable," the report adds, "that competition must be increasingly intense. Depreciation of the yen has been deliberately used to embark on a reckless national sales policy with disastrous results to British and other traders in various markets."

Favors Gold Standard

Prof. Gregory Urges Return To Gold Standard Of The World

Vienna.—Delegates to the seventh congress of the International Chamber of Commerce, gathered at their first real burst of enthusiasm when Prof. T. E. Gregory, of Great Britain, urged the nations of the world to return to the gold standard. All attempts to manage a paper currency have only made a bad situation worse, Prof. Gregory declared, and individual nations are timid about returning to gold because each fears others will make use of the opportunity to obtain special advantages.

The way to overcome this fear, the British representative told the congress, was to return to the gold standard of a lonely road—we must all take the road together."

Other speakers shared his views, but Elliot Wadsworth, of Boston, Mass., warned the congress to remember that the gold standard really is "99 per cent. confidence and one per cent. gold."

Mr. Wadsworth said he would prefer to emphasize balancing budgets and restoring to its pedestal the old maxim, "as good as a government bond."

Defective Ties Blamed

Raynes Park, Surrey.—A coroner's jury inquiring into deaths of five persons, including Redcliffe Duthie, 11, a Vancouver-born boy, killed in the derailment of a train, returned a verdict of accidental death. The jury added a rider to the verdict, however, stating that the accident was due to failure in packing of the ties along the track.

Seeking Trade With Russia

New York.—Trade discussions between the United States and Russia, looking toward an enlargement of the export market for American agricultural products will take concrete form very soon. They will centre largely on livestock and live stock of the Soviet Union's prime needs.

Crop Conditions Promising

Ottawa, Ont.—Report on the prairie crop conditions issued by the Dominion Bureau of Statistics recently, declares that the spring season is generally reported as a live stock and conditions are particularly good, perhaps the best since 1928.

National Research Council Reports On Relative Value Of Various Feeds For Livestock

The pressure of the disastrously low prices of grain now being experienced has driven many farmers into the farming community to seek more profitable returns, by feeding their produce on the farm and marketing it in the form of livestock. This return has caused increased interest in the relative utility and value of the different grains for various classes of farm animals. The information contained in the recently published Report No. 28 of the National Research Council "The Comparative Feeding Values for Livestock of Barley, Oats, Wheat, Rye and Corn" should therefore be of considerable practical value to farmers and stockmen.

In a forward to the Report Dr. R. Newton, Director of the Division of Biology and Agriculture of the National Research Council, states that the lack of authoritative published information on this question, and the desirability of summarizing the results of feeding experiments, particularly with regard to barley, a home-grown product, and corn, a product largely imported, was brought to the attention of the Associate Commissioner on Grain Research of the Council by officials of the wheat pools. Having ascertained that Professor C. W. Crampton of Macdonald College had already begun some work along this line, the Council made a grant to assist him in reviewing all the published literature conveniently available on the comparative value of barley, oats, wheat, rye and corn for feeding horses, cattle, sheep and swine. In this Report Professor Crampton makes available the results of his inquiry.

For the purpose of his survey Professor Crampton has consulted 350 published accounts of feeding experiments conducted in 17 provinces of Canada, 28 States of the United States and 8 overseas countries. Whenever possible quantitative data respecting gains and feed consumption have been extracted from these accounts and tabulated according to the grain comparison and class of stock involved. From this he has been able to make a comparison of the relative value of grain, and the rate of gain, and other measures of efficiency, representing the combined experience of numerous different investigators. A statistical method has been employed to test the significance of all observed differences between the grains compared.

An encouraging feature of the findings is the indication obtained that in general the Canadian feeder is not handicapped by the lack of corn for fattening steers. Wheat appears to be more efficient than corn for hog fattening. The other grains, however, suffer somewhat by comparison with corn in this connection and for sheep fattening all, including wheat, appear to be inferior to corn. In general the differences are small, and seem to be roughly proportional to the amounts of fibre contained in the various feeds. Special characteristics, particularly in the case of rye, also limit to determine the usefulness of the several grains for special purposes or for certain feeding classes. The value of the Report to investigators is increased by a section in which Professor Crampton discusses the planning and reporting of stock-feeding experiments in the light of the lessons to be learned from the numerous trials examined in the course of this study.

A comprehensive summary of the findings which are discussed in detail in the body of the report is provided. Whilst it is anticipated that the report as a whole will probably be of interest mainly to investigators, this summary (which is being reprinted separately) contains a brief but full summary of the value and interest to practical stockmen.

The report or the summary may be obtained upon application to the National Research Council or the Federal Department of Agriculture, Ottawa.

Magistrate—"Why did you bite your husband's mother?"
Culprit—"Twas 'is fault, your worship. 'E was always throwin' 'er in my teeth."

Porto Rico's present sugar crop is believed to be the third largest in the island's history.

About 300 (or 700) pounds of cocoa are grown annually in the Gold Coast territory of Africa.

Bird Banding In Canada

Band On Pintail Duck Shot In
Quebec Reveals Bird Came From
Iceland

The study of the migration of birds and particularly the movements of those protected on this continent under the provisions of the Migratory Birds Convention is carried on in Canada and the United States as a joint effort by the departments of government concerned. Aluminium bands are used in this study and many interesting and valuable facts have been compiled. As a result of banding operations, a tagger with duck of the pintail or sprig variety that was killed in the eastern part of the province of Quebec last year has now been found to have come from Iceland, where it was hatched.

Pintails are not uncommon on this continent as they nest in large numbers in Western and Northern Canada (as well as in Europe and Asia), and they are often seen on migration in the province of Quebec, but this is the first known case of a bird from Iceland being shot in North America.

A resident of Brantford, Ont., Quebec, a little village near the west end of the Strait of Belle Isle, while out hunting flushed a drake pintail from a small pond and shot it. When he picked up his bird he was surprised to find a small ring of aluminium on one of its legs. On examination he discovered that the band bore a name and a number which he recognized as Danish and stamped on it. The band was preserved and later shown to a member of the Migratory Bird protection staff of the Department of the Interior. The matter was reported to Ottawa and as a result of the inquiries instituted in Denmark it was revealed that the duck had been banded when yet a duckling on June 30, 1936, in Adalstadi, northern Iceland, and later released.

The marking of wild birds with aluminium bands is a method of investigation increasingly used by scientists in Europe, North America, and Japan, that is yielding surprising and valuable information. In North America this work is carried on as a joint project by the National Parks Branch of the Canadian Department of the Interior and by the Biological Survey of the United States Department of Agriculture. Canadians wishing to assist in placing such bands must first obtain permits from the Department of the Interior, but all persons finding such bands on wild birds or their remains are requested to notify the Commissioner of the National Parks of Canada, Department of the Interior, Ottawa, quoting the number of the band and stating when and where it was discovered, so as to aid in this unusual research.

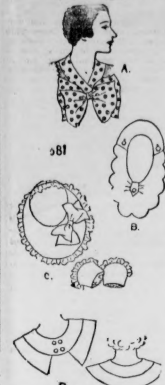

A Novel Card Table
Alfred Erickson, unemployed laborer, of Racine, Wisconsin, has finished after two years' work a novel card table with a top containing more than 3,000 pieces of wood. The motif is patriotic, a bust of Washington decorating the center, surrounded by a wall of stars. The table is a head of Liberty, a buffalo and Fort Dearborn.

A door-to-door canvasser says that the average call he makes is futile. Not worth a rap.

Peru may have a sales tax of 10 per cent. on luxuries.

UNWISCONSIN LITTLE BITS OF LINGERIE THAT COUNT SO MUCH FOR SMARTNESS

They are so flattering! What grand time you can have making one or all of these "bits" of lingerie for your spring wear. It is such dainty interesting sewing you can do in your spare evening. They require the minimum of material, and cost you next to nothing. Organza, plique, net, lace and crepe silk are popularly used. Style No. 68 includes the four different types and is designed in size only.
Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Some Truth In It

European Women Old-Fashioned and Therefore May Be Better Off
Miss Andree Colin, one of the few women executives on the League of Nations staff, believes her European sisters are better off than United States women because they are old-fashioned. "Because women in Europe are kept so very much to the old-fashioned women's way of life they are less badly affected by current economic conditions than your women here," she said. "The younger women of Europe look to getting married as a job in life, not to find, married jobs and careers. I do not like young mothers for office workers. One of two things suffer, the home or the job."

CANADIANS HONORED AT MCGILL CONVOCATION

A number of prominent Canadians were honored at the McGill Convocation by the conferring of degrees. Perhaps the most prominent recipient was His Eminence Cardinal Villeneuve, Roman Catholic Archbishop of Quebec, who is shown above with a number of prominent personalities at McGill University. Front row, left to right: Bishop Paré, Anglican Bishop of Montreal; His Eminence Cardinal Villeneuve, and Senator Hon. A. B. Brown. Second row, in center, Dr. W. W. Beatty, President of the Canadian Pacific Railway, who is Chairman of the University; Sir Arthur W. Currie, and on his left in gown, Mr. John Ross, Black, Col. Herbert Molson, W. A. Black, Hon. Vincent Massey, who also received the degree of Doctor of Laws, and Mr. Henry Birks. In the doorway is Mr. Huntley Drummond.

Joint Commission On Conservation and Afforestation Hold Meeting at Regina

The Joint Commission on Conservation and Afforestation of the prairie provinces of Canada, held its inaugural meeting in the Parliament Buildings recently in Regina.

There were present the following members of the Provincial Commissions on Conservation and Afforestation: Representing Saskatchewan—Hon. James F. Bryant, W. D. Cowan, M.P., Professor C. J. Macdonald, Dean of Engineering of the University of Saskatchewan and T. A. Patrick, M.D., Yorkton. Representing Alberta—Hon. B. G. Reid, Provincial Treasurer and Minister of Natural Resources for Alberta. Representing Manitoba—C. H. Atwood, Deputy Minister of Natural Resources and Industries, Col. H. J. Stephenson, Provincial Forester and Professor J. H. Ellis, Professor of Soils, Agriculture Department, University of Manitoba.

It was agreed to establish a joint Manitoba—Saskatchewan—Alberta Commission with the provincial committees collaborating under one chairman. It was distinctly understood that the joint committee function in the matter of assembling and acquiring data in co-operative way only and does not bind the respective provinces to any individual decision but exists only for the purpose of making recommendations.

Hon. James F. Bryant, Chairman of the Saskatchewan Commission was elected chairman of the joint commission. The Commission then drew up an agenda and discussed the following matters in relation to the work to be undertaken:
1. Climate. 2. Afforestation. 3. Conservation, under the following heads: (a) Water; (b) Forests; (c) Soils; (d) Scenic beauty; (e) Game; (f) Fish; (g) Bird life; (h) Fur bearing animals. 4. Drought problems and how to meet them.

The following programme was adopted as the aims and objects of the joint Commission.

Aims:—1. To institute a scientific research of climatic conditions in the prairie provinces.
2. To apply the results of said research to the problems facing each community in the western provinces with particular reference to provincial administration with respect to industrial development, as it relates to agriculture, forestry, game, fur bearers, fisheries, land settlement and water resources.

The objects of the joint commissions work are:—(a) Conservation of water; (b) Prevention of erosion and soil drifting; (c) Soil survey and land utilization studies; (d) Shelter belts, location and types; (e) Reserving for forestry purposes all areas unsuitable for agricultural purposes; (f) Permutation of areas unsuitable for agricultural purposes; (g) Conservation of forests and timber; (h) Providing shelter and preservation of game, fur bearers, recreational areas and industries depending on the forests and forest products here.

Stress was laid on the importance of the soil surveys in relation to settlement, and also in particular with regard to the type of tree species to be recommended for each locality.

The joint commission made several recommendations which were passed on to the provincial commissions for study and execution, among them the removal of different species of trees on sandy soils where the water table was low and also species suitable for soils where the water table was high and drainage good.

The following among other resolutions were passed:
"That areas which are not suitable for agricultural purposes be withdrawn from settlement and reserved for forestry purposes, and that the several provincial Commissions be urged to study the feasibility of afforestation of such areas as seems suitable, attention being especially called to the desirability of planting or continuing in forests the hardwoods of all streams."

"That the joint Commission on Conservation and Afforestation desires to place on record its appreciation of the splendid work carried on by the Forestry Department of the Federal Government. The Commission recognizes with appreciation the leadership in the matter of tree planting in the prairie provinces given by Norman M. Ross, of Indian Head, Chief of the Forestry work in Western Canada. The joint Commission also desires to express appreciation of the splendid educational work in the matter of tree planting being done by the Forestry Extension Association through their tree planting car."

"That this joint Commission appreciates the co-operative effort in the matter of soil survey given by Norman M. Ross, of Indian Head, Chief of the Forestry work in Western Canada. The joint Commission also desires to express appreciation of the splendid educational work in the matter of tree planting being done by the Forestry Extension Association through their tree planting car."

The Oyen News

About Town and Country

Millinery Announcement—I have a few hats to clear at \$1.95 each, at my home on Second Avenue. Mrs. R. E. Gillespie, Oyen.

Born—To Mr. and Mrs. E. D. Thygesen of Oyen, on Saturday, June 3, a daughter.

Mr. George Langmuir motorized to Saskatoon last Friday returning to Oyen Saturday morning, accompanied by Mr. and Mrs. Clifford Hall, of Tremonton, Ont.

Mrs. J. Love left last Sunday for Saskatoon, where she will spend a week visiting her daughter, Mrs. Fred Lockhart.

Mr. H. J. Cooper, who spent a few days last week in Moose Jaw, Sask., returned to Oyen last Saturday. Mr. Cooper reports that while he was in the city, he saw an inch of rainfall in one half hour.

Don't forget Oyen Sports on Wednesday, July 5.

Mrs. R. Nisbet arrived in Oyen from Calgary last Friday night.

Miss Lillian Reinhold left Oyen last Saturday for Athabasca Landing, where she will spend the summer at her home. Miss Reinhold has intimated that if conditions here are favorable, she may return in the fall and continue to give pianoforte lessons.

Belden Wenger, who has been in Grand Rapids, Mich., returned to Oyen Monday morning.

Cecil Burns left for his home in Canyon City, B. C. last Sunday.

Mrs. P. A. Beallergoon held a shower at her home last Friday for Mrs. J. Lambert.

Mrs. F. A. Pope of Haven, spent a few days in Calgary last week.

Mr. L. Goldammer, returned to Oyen this morning from Carleton Place, where he has been engaged in combining some of last year's crop. He will work this summer at the Fuego Oil Company's well, south of Oyen.

Mr. C. V. Johnson, who went in to Calgary last Thursday, returned to Oyen yesterday with Mrs. C. V. Johnson.

Mrs. W. Affleck is visiting her son Mr. W. J. Affleck north of Exel.

Thomas Morrow Passes

By the death of Mr. Thomas Morrow, which occurred Tuesday morning, June 6, 1933, another pioneer of the district has passed. The funeral service will be held at the home of his daughter, Mrs. D. Warwick, on Wednesday, June 7, at 2 o'clock in the afternoon, and interment will follow at Oyen cemetery.

The late Mr. Morrow, who died in his 83rd year, was born in Antrim County, Ireland. He came to this district in 1910, and homesteaded ten miles north and one mile east of Oyen. He was predeceased by his wife about thirty years ago, and one son in 1918, and a daughter in 1928. He is survived by a son and daughter in Connecticut, and two daughters in this district. Mrs. David Warwick and Mrs. Fred Trewin. Rev. E. F. Kemp of Oyen, will conduct the funeral services.

Commencing today (Wednesday, June 7) and continuing through the months of June and July, early closing on Wednesdays will be observed by the business men of Oyen. Places of business will close at 1 p.m.

Mr. and Mrs. W. V. Miller, Gordon and Vernon, left last Sunday to spend a few days in Calgary.

Mr. and Mrs. R. C. Anderson and Mrs. J. B. Lowe, who attended the annual meeting of the Grand Chapter O. E. S., in Banff last week, returned to Oyen, Sunday. They were accompanied on the return trip from Calgary by Miss Etta Hatch.

Miss Mary Byler, who was given honorable mention at the close of the Normal School term in Calgary, returned home last Friday.

Miss E. Dalton of Calgary, who arrived in Oyen last Saturday is a guest at the home of her niece Mrs. R. J. Scott.

The girls softball team played a return game with Neblata on Sunday afternoon and won by a score of 17-8. In last week's issue of the News an item about the splendid showing the Oyen girls team made at Youngstown on May 24, was omitted. The team turned in two excellent performances, defeating Youngstown and Starnmore to win first money.

A splendid opportunity to make a two day visit to Calgary is offered Districts along the Alaskan Calgary line of the Canadian National Railways on the morning of Friday, June 16, when round trip bargain fares will be in effect. Arriving in Calgary at 9 a.m. passengers can return up to 6.40 p.m. Saturday, June 17.

Uniform Game Laws

More uniform game laws and fees for the prairie provinces were urged at a conference of game officials of the three governments at Edmonton last week.

Live Stock Men Warned

Serious losses of live stock, as a result of the eating of the poisonous weed known as water hemlock are occurring in the province, according to Dr. Percy Talbot, Provincial Veterinarian, who warns all live stock owners to be on the lookout for the weed, which should be destroyed as quickly as possible by grubbing out the roots, drying and burning them. The water hemlock is a tall, erect, marsh plant growing from two to six feet high, with stems fairly stout and streaked with purple, bearing a few pale green doubly compound leaves, and many quite flat clusters of very small, greenish white flowers. The root consists of a bunch of fleshy, tapering projections, attached to the root stocks. This poisonous plant is found in local patches throughout the province in the foothills and on the prairie, always in low, wet, marshy ground. It occurs along creeks, irrigation ditches, edges of sloughs, and lakes and in low meadow land. The most poisonous parts of the plant are the root stock and roots but the stems also contain poison as well as the leaves of young plants. The poison acts quickly and is deadly.
